

# Dr. Danhui Xin

Scientist

Chemistry Department

Southern California Coastal Water Research Project

---

## Education

Ph.D., civil engineering, University of Delaware, 2021

M.Eng., environmental engineering, Tongji University, 2015

B.S., environmental engineering, Tongji University, 2012

## Professional Experience

Scientist, Southern California Coastal Water Research Project. Costa Mesa, CA. 2023-present

Postdoctoral Researcher, University of Delaware, Department of Civil and Environmental Engineering. Newark, DE. 2021-2023

DENIN Environmental Fellow, University of Delaware, Delaware Environmental Institute. Newark, DE. 2018-2020

Graduate Research Assistant, University of Delaware, Department of Civil and Environmental Engineering. Newark, DE. 2016-2021

Research Assistant, Muroran Institute of Technology, Department of Architecture and Civil Engineering. Muroran, Japan. 2016

Graduate Research Assistant, Tongji University, College of Environmental Engineering and Science. Shanghai, China. 2012-2015

Visiting Scholar, University of Tokyo, Department of Environmental Systems. Tokyo, Japan. 2014

Summer Fellow, Kyushu University, Department of Urban and Environmental Engineering. Fukuoka, Japan. 2011

# Honors and Awards

The Raymond Manganelli Award. 2022-2023

The Air Pollution Educational and Research Grant Scholarship Program. 2021-2022

C. Ellen Gonter Environmental Chemistry Paper Award, ACS Division of Environmental Chemistry. 2021

ACS ENVR-SETAC Exchange Travel Award. 2021

University Dissertation Fellowship, University of Delaware. 2020-2021

Graduate Student Award, ACS Division of Environmental Chemistry. 2020

Environmental Engineering Research Award, College of Engineering, University of Delaware. 2019

Delaware Environmental Institute (DENIN) Environmental Fellow. 2018-2020

Carski Family Foundation Fellow. 2018-2020

Excellence in Student Service Award, Tongji University. 2011

University Student Leader Award, Tongji University. 2009

Academic Achievement Scholarship, Tongji University. 2008-2009, 2009-2010

# Selected Presentations and Conference Proceedings

Xin, D. 2023. Application of voltametric microelectrodes for studying redox biogeochemistry in Prairie pothole wetland sediments. Oral Presentation, ACS National Meeting, Indianapolis, IN.

Xin, D. 2023. Application of voltametric microelectrodes for studying redox biochemistry in Arctic sedimentary porewaters. Poster Presentation, Toolik Field Station All Scientists Meeting, Santa Barbara, CA.

Xin, D. 2022. Field demonstration of an integrated nanoscale zero valent iron-hydrogen peroxide process for complete destruction of munitions constituents in wastewater. Poster Presentation, SERDP and ESTCP Symposium, Arlington, VA.

Xin, D. 2022. Abiotic reduction of munitions constituents by wood-derived biochar through its rechargeable electron storage capacity. Poster Presentation, Environmental Sciences: Water, Gordon Research Seminar and Conference, Holderness, NH.

Xin, D. 2021. Field demonstration of an integrated nZVI-H<sub>2</sub>O<sub>2</sub> process for complete removal of munitions constituents in wastewater. Poster Presentation (co-author), SERDP and ESTCP Symposium 2021, Virtual.

Xin, D. 2021. Abiotic reduction of NTO, DNAN, and RDX by wood-derived biochar through its rechargeable electron storage capacity. Poster Presentation, SERDP and ESTCP Symposium 2021, Virtual.

Xin, D. 2021. Abiotic reduction and sorption of the insensitive munitions constituents by wood-derived biochars. Oral Presentation, SETAC North America 42<sup>nd</sup> Annual Meeting, Virtual.

Xin, D. 2021. Origin of electron storage capacity of black carbon (biochar): pyrolysis of lignocellulosic biomass. Invited Oral Presentation, Fall 2021 ACS National Meeting, Atlanta, GA.

Xin, D. 2021. Electron storage capacity (ESC) of biochar for supporting transformation of explosives. Oral Presentation, UD 2021 Graduate Students' Forum, Virtual.

Xin, D. 2021. Reductive transformation of 3-nitro-1,2,4-triazole-5-one (NTO) by biochar through its electron storage capacity (ESC) Oral Presentation, Spring 2021 ACS National Meeting, Virtual.

Xin, D. 2021. Comparison of mediated electrochemical analysis and chemical redox titration for measuring the electron storage capacity of biochar. Poster Presentation, Spring 2021 ACS National Meeting, Virtual.

Xin, D. 2020. Sorption and reductive degradation of munitions constituents by biochar", Poster Presentation, SERDP and ESTCP Symposium 2020, Virtual.

Xin, D. 2020. Quantifying and visualizing the spatial distribution of black carbon's electron storage capacity. Poster Presentation, Spring 2020 ACS National Meeting, Virtual.

Xin, D. 2019. Biochar as a nanosilver support medium for water disinfection. Oral Presentation, Fall 2019 ACS National Meeting, San Diego, CA.

Xin, D. 2019. Assessing the reversibility of electron storage capacity of biochar by chemical methods", Oral Presentation, Fall 2019 ACS National Meeting, San Diego, CA.

Xin, D. 2019. Chemical methods for determining the electron storage capacity of black carbon (biochar). Poster Presentation, Human and Climate Series III: Water Management and Policy, Dover, DE.

- Xin, D. 2019. Quantifying and visualizing the electron storage capacity (ESC) of biochar. Oral Presentation, 4<sup>th</sup> DENIN Graduate Student Symposium, Newark, DE.
- Xin, D. 2018. A method to prepare nano-silver-amended carbons for drinking water and irrigation water treatment. Exhibition and Poster Presentation, UD Tech Innovation Showcase, Newark, DE.
- Xin, D. 2018. Electron storage capacities (ESC) of biochar and other black carbon materials. Oral Presentation, US Biochar Initiative (USBI) Biochar 2018, Wilmington, DE.
- Xin, D. 2018. Biochar as a silver nanoparticle support for irrigation water treatment. Poster Presentation, CONSERVE Annual Meeting, College Park, MD.
- Xin, D. 2018. Electron storage capacities of biochar and other black carbon materials. Poster Presentation, 3<sup>rd</sup> DENIN Graduate Student Symposium, Newark, DE.
- Xin, D. 2017. Determining the electron storage capacities of carbonaceous geobatteries via chemical redox titration. Poster Presentation, 2<sup>nd</sup> DENIN Graduate Student Symposium, Newark, DE.
- Xin, D. 2016. Modeling of soil gas profiles in the bared and vegetated areas of landfill. Oral Presentation, 9<sup>th</sup> Intercontinental Landfill Research Symposium, Noboribetsu, Hokkaido, Japan.
- Xin, D. 2016. Survey on the status of the waste disposal sites in Hokkaido. Poster Presentation, Spring Conference of Japanese Society of Material Cycles and Waste Management, Tokyo, Japan.
- Xin, D. 2014. The effect of vegetation on diel methane emission patterns in landfill. Poster Presentation, 8<sup>th</sup> Intercontinental Landfill Research Symposium, Crystal River, FL.
- Xin, D. 2014. The effect of vegetation on diel methane emission patterns in landfill. Oral Presentation, 5<sup>th</sup> China-Japan Joint Conference for the Community Formation on Material Recycling and Solid Waste Management, Sapporo, Japan.
- Xin, D. 2013. Dehydration and solidification/stabilization of high organic content sewage sludge by combined aluminate cement. Oral Presentation, 7<sup>th</sup> International Symposium on the East Asian Environmental Problems, Fukuoka, Japan.
